<p>Dewberry Engineers is submitting this permit application on behalf of the Superior Metropolitan District No. 1. The Water Treatment Plant has two clariflocculators and high winds affect the ability for them to operate efficiently; the clariflocculators are the first step in the treatment process and a decrease in their efficiency impacts the filters downstream. The immediate issue is to cover the west, clariflocculator no.2 because the wind comes directly down the slope of the reservoir directing onto the water surface of this clariflocculator. The installation of the cover will minimize the wind impacts and increase the efficiency of the clariflocculator and the filters. The clariflocculator cover</p>	3850
